

Biological Engineering Leadership Award – Call for Nominations –

Purpose

The purpose of the Biological Engineering Leadership Award is to encourage, recognize and reward leadership in the field of Biological Engineering.

Eligibility Requirements

- Awardees must be members of IBE.
- Awardees are to have provided significant leadership in the field of Biological Engineering. Leadership should be realized through achievement in research, education, or professional practice.
- Particular attention will be given to recognized leaders:
 - who innovate and define areas of inquiry in Biological Engineering;
 - who develop and implement educational strategies and content in Biological Engineering; and
 - who advance Biological Engineering through their professional practice

Nomination Process

Submit nominations by **November 1, 2009** to:
Ronald Sims
Biological & Irrigation Engineering Department
Utah State University
4105 Old Main Hill
Logan, UT 84322-4106
435-797-2785
Ronaldsims1@gmail.com

Nomination Documents

1. Curriculum Vita;
2. Dates of membership in IBE;
3. A letter of nomination stating the specific accomplishments and achievements that distinguish the individual in light of the eligibility requirements; and
4. Letters of support from three (3) professionals who can attest to and affirm the significance and importance of the accomplishments and achievements

Other Details

- Electronic submissions are encouraged.
- Nominate yourself or a colleague.
- New awardees will be presented at the 2010 IBE Annual Meeting.
- Nominees not recognized with an IBE Leadership Award will be maintained and reviewed for 2 consecutive years. After which, a new nomination is required for further consideration.
